BS

5. (Amended) A material for controlling organisms according to Claim 4, wherein the ceramic is a material or a combination of materials selected from hydroxyappatite ceramics, barium titanate ceramics, strontium hydroxyappatite ceramics, hydroxyappatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics, glasses and crystallized glasses which contain calcium phosphate, stabilized and partially stabilized zirconia ceramics, ion conductive alumina (so-called β-alumina) ceramics, and piezoelectric ceramics containing lead.

BO

9. (Amended) A material for selective adsorption of proteins according to Claim 8, wherein the ceramic is a material or a combination of materials selected from hydroxyappatite ceramics, barium titanate ceramics, strontium hydroxyappatite ceramics, hydroxyappatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics, glasses and crystallized glasses which contain calcium phosphate, stabilized and partially stabilized zirconia ceramics, ion conductive alumina (so-called β-alumina) ceramics, and piezoelectric ceramics containing lead.

13. (Twice Amended) A cement material according to Claim 11, wherein the ceramic is a material or a combination of materials selected from hydroxyappatite ceramics, barium titanate ceramics, strontium hydroxyappatite ceramics, hydroxyappatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics, glasses and crystallized glasses which contain calcium phosphate, stabilized and partially stabilized zirconia ceramics, ion conductive alumina (so-called β-alumina) ceramics, and piezoelectric ceramics containing lead.

BII

16. (Twice Amended) A biomaterial according to Claim 14, wherein the ceramic is a material or a combination of materials selected from hydroxyappatite ceramics, barium titanate ceramics, strontium hydroxyappatite ceramics, hydroxyappatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics, glasses and crystallized glasses which contain calcium phosphate, stabilized and partially stabilized zirconia ceramics, ion conductive alumina (so-called β-alumina) ceramics, and piezoelectric ceramics containing lead.

B12

- 20. (Amended) A cement material according to Claim 12, wherein the ceramic is a material or a combination of materials selected from hydroxyappatite ceramics, barium titanate ceramics, strontium hydroxyappatite ceramics, hydroxyappatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics, glasses and crystallized glasses which contain calcium phosphate, stabilized and partially stabilized zirconia ceramics, ion conductive alumina (so-called β -alumina) ceramics, and piezoelectric ceramics containing lead.
- 21. (Amended) A biomaterial according to Claim 15, wherein the ceramic is a material or a combination of materials selected from hydroxyappatite ceramics, barium titanate ceramics, strontium hydroxyappatite ceramics, hydroxyappatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics, glasses and crystallized glasses which contain calcium phosphate, stabilized and partially stabilized zirconia ceramics, ion conductive alumina (so-called β -alumina) ceramics, and piezoelectric ceramics containing lead.
